

# Magicawrap-Tape

## Product Information

Pressure Sealing Rubber Tape

### Product

For Straight Pipe

For joints

### Description

Pressure Sealing Rubber Tape, specially designed to stop leaks in pipes impossible to shut down, can stop leaks at upto 0.5MPa

Patent :

Magicawrap-Tape (Oris-Tape in Japan) is patented in Japan, U.S.A, Korea, China, Taiwan, Hong Kong and EPC(Europe)

### Applications & Benefits

Repair of pipes under pressure upto 0.5MPa

Sealing of pipe joints under pressure, A vinyl tape fused into one end of the Magicawrap-Tape allows to stick to the pipe under pressure.

Continue to wrap over the leak so that the product pushes back onto itself. This ensures that the product consistently applies greater pressure to the pipe and thus seal the leak. Strong and versatile.

### Physical Properties

Physical State	Solid
Odor	Distinct smell of rubber
Vapor Density	1.2
Solubility in water	Insoluble
Solubility in Organic	Soluble 01' Swelling
Flash Point	Not appropriate
Flammability	No date available
Combustion Product	Combustion Product : Carbon Dioxide, Carbon Monoxide, Hydrocarbon, Sulfur Oxide etc.,

### Chemical Resistance

OIL	Depend on condition
CARBON DIOXIDE	Depend on condition
NITROGEN	Possible
HYDROGEN	Possible
OXYGEN	Possible
CARBON MONOXIDE	Depend on condition

**Heat Resistance : max.50°C(Normal type)  
: max.80°C(Hot water type)**

**The product meets by 100% the standard in rubber goods for tap water works by JIS (Japan Industrial Standard)**
